

innovation for a healthier future

See us at the Healthcare Innovation Expo, London

ExCel Conference and Exhibition Centre, Docklands London, 9th and 10th March 2011

For the second year running we have been invited to participate in the Healthcare Innovation Expo, which is taking place at the ExCel Conference and Exhibition Centre in Docklands London on 9th and 10th March 2011.

Healthcare Innovation Exp 2011 is the premier two-day event for health and social care commissioners and providers. It is a fantastic opportunity for innovators from the UK and across the world to showcase and share their ideas and best practice, and to show how these could be adopted in every workplace to improve patient care and productivity.

Come along and meet members of our team to learn more about our award winning innovative cardiology scheme with Bexley Care Trust, which is enabling patients from Bexley to travel to the European Scanning Centre to benefit from revolutionary CT coronary angiograms on our Aquilion ONE 640 slice CT scanner. This multi award winning innovation in cardiology has resulted in improved clinical outcomes and cost efficiencies within the NHS.

We are on Stand 66 and look forward to seeing you there.
